

RetroSearch

1980 – 1989 Passenger Vehicle Catalog (28 Sep 2023)

RetroSearch is a small application that allows a user to search for and view information about certain passenger vehicles manufactured by Toyota between the years 1980 – 1989.

There are 6 attributes associated with each vehicle:

- **Model Code**
- **Model Year**
- **Model Name**
- **Engine**
- **T/F if sedan**
- **One Fun Fact**

The application is straightforward and simple. The user will enter one of the following to return a valid match:

- The **year** of the vehicle
- The **model code** of the vehicle
- The **model name** of the vehicle
- “All” to display all vehicles and attributes
- “Quit” to exit the application

String data will be read as the **model code** or **model name**, any numeric data will be read as the **year** of the vehicle.

If the user input is invalid (i.e. invalid model code, invalid year, decimal number, etc.), a message will be displayed to the user: “Please enter a valid search attribute!”

Happy searching!
